## About This Game

In a dusty, dark corner of an old shabby room, a TV crackles to life and a collection of VHS tapes call to you. Prepare to embark on a journey through a dark forest, a frozen wasteland, a mysterious ocean and an abandoned facility. Each location you visit is shrouded in secrets hidden in plain sight...but be aware, not everything is as it seems.

## Features

- Heart-pounding fear and stressful fun
- Each location you visit has its own unique feel & challenges
- An overarching mystery that is waiting to be solved
- After completing an area, you can unlock an extreme remixed version of that area
- Find collectibles hidden through the game

I personally have been playing the R6 Vegas series for a very long time and have enjoyed it to this day  
Although i have played the old Rainbow Six Games before but not much. Only have played Rogue Spear

What do i think of this game ? Well, coming from a person who have been playing Spunkgargleweewee, i really enjoy  
Rainbow Six 3 Raven Shield

I would say it's an almost perfect sequel to the 2 older games, Rogue Spear and the original Rainbow Six.  
Having better graphics and surprisingly, first person view models. Texture is better, character models are well detailed  
Gameplay-wise, it's still the same old Rainbow Six game; Slow-paced, u die very easily and u only get one chance.

The game is pretty fun and frustrating at the same time coz u'll never know what is gonna come up next. Clearing rooms, wide  
areas, u wont know whether u'll die or not and that's the point of being tactical. Cover the corners, make sure that the room is  
clear, using different grenades to ur advantage.

In conclusion, if u're a fan of Rainbow Six, this is the last Rainbow Six game right before the Vegas series to stand true to the  
old Rainbow Six vibe. I recommend u to pick it up and just play it. Although the online experience is pretty dead but there are a  
few servers that has players in them.

If u're NOT a fan of Rainbow Six, it is ur choice. Whether u like slow-paced shooters or not, i highly recommend it.

I'd give this game an 8/10. Thank u for reading :). As for all the Quell serie, it's an excellent puzzle game. Sometimes hard, but  
always doable at 100% thanks to the great help system.. Its kinda sad really. Frontiers adds a lot to Anno 2205 that the game  
desperatly needed to be a good game. Invasions finally bring the military game into its own, the new sectors provide new  
challenges and the synthetics provide a potentially powerful late game advantage (if you can provide for them, the enitited  
silicon \*\*\*\*\*). Unfortunately, like all things, timing and presentation is key. The choice to not include this on the season pass or  
the gold edition are both baffiling and insulting to the consumer. And purchasing this may set a worrying standard which only  
encourages further dlc to be seperated from the supposed "complete" package. It is a dangerous move that could destroy what  
credibility the Anno series has left, given how 2205 is pretty subpar compared to 2070 and 1404.

TLDR: If you enjoyed Anno 2205 and want more of it, and either didn't get the season pass or don't mind ponying up another  
12 US dollars, then by all means, ignore that fat thumbs down on this review and purchase this dlc. For myself though, given the  
fact that Ubisoft saw fit to charge for that last little bit that 2205 needed to at least be remotely near as good as its forebearers,  
1404 and 2070, and seperate that charge from the season pass\gold edition for that little bit of extra cash, I can not recomend  
this dlc. It is an awful move that only serves to highlight Ubi's greed.. the game is bad and the price is to high. low quality  
scenario. Very nice. Two sets of puzzles the "basic" (easy) and the normal (the original one) give dozens of hours of fun.. Why  
does the players move so slow? 5 mins in the game is about 15 mins in real life. Please make the game have a faster pace..  
intense, worth the 10 mins and plus scared the crap out of my mates

---

If you can play it fast enough, you can complete the game under 2 hours and get a refund. You shouldn't, but the developers should have made it just a little longer. I would compare it to a movie ticket if anything. I've really been looking forward to this game, and I bought it as soon as it was released. It still has a way to go but im looking forward to when the glitches are fixed. Here are some of the things that need to be changed:

-It takes WAY too long for the next piece to come out. Once your current piece lands, there is a large delay between when it lands and when your turn stops. This would be okay if you could still move, but you can't. The piece just sits there until it thinks that turn is over.

-The pieces fall too fast. It would be a big help if you could change the fall speed, difficulty, etc.

-The pieces fall like they are affected by gravity. This wouldn't be a problem except that the physics are buggy. Every once in a while a piece will bounce and go flying off, sometimes out of the boundaries.

-The white pieces are glitchy. Occasionally you will be able to control the white piece, but most of the time it just goes back and forth, left and right. This sometimes messes up lines that are set up.

-We need two rotate buttons. One clockwise, the other counter-clockwise. It would also be nice if the pieces stayed in place when rotating instead of moving around.

That's about all I can think of at the moment. I hope these get fixed soon.

Thank you for your time!. Lots of different styles here, and it all sounds really cool.. Alexander expansion adds a fun story campaign as Alexander the Great (Macedon). There is not as much depth as Barbarian Invasion, let alone the base game, but it adds an interesting enough dimension as an expansion.

. Good game! Easy to pick up and play. Good for those nights where u dont want to worry about anything too stressful.. Couldn't get out of the first room. It's a nice little challenging game, but nothing groundbreaking - nevertheless, fun for like half a hour.. To be honest its not the really fun. At first you'll be like. WOOOOOO YYYAAAAYYYY, but 12 minutes later. wooo...yay, 31 minutes later. What am I doing with my life.. Great Software. If you are interested in the publishing feature (publishing directly to youtube) you will want to go directly to the acoustica site though and get the version that is 10 dollars more.. dolphins who does not love them
